

Ethan Norfleet, WORK LOG

Milestone 2 Work:

Sunday, January 15, 2023

We created RTL for the R-type instructions, jalr, and jal as a group. We assigned tasks for each team member at the meeting to complete by the next meeting. My task was to create RTL for the bne, wri, and rea. [1 hour and 10 minutes]

Monday, January 16, 2023

We looked over the RTLs each team member had created and revised them if any improvements were necessary. [30 minutes]

Wednesday, January 18, 2023

We determined naming conventions as a group. We made up conventions that were consistent across similar components and made the use of a particular instance of a component clear. We also made a table of component specifications as a group. [1 hour]
