1/11/23

- Adjusted assembler based on changes to instruction set
- Adjusted memory map
- Translated euclid's algo and gcd into machine code

1/9/23

- Built assembler

1/8/23

- Met with team members to start milestone 1
- Chose load-store
- Worked on building instruction set, instruction types, and registers

1/9/23

- Created script to translate assembly into machine code
